IATA Common Use Self Service (CUSS)
New CUSS 2.x Environment | Coming Soon!

Most of the technologies incorporated by CUSS 1.x have already reached their End of Life, will be deprecated in the next years, or are no longer supported or maintained. The new CUSS 2.x environment addresses these issues and provides opportunity for several enhancements.

What?	• **Entirely New** Version of CUSS • **Modernizes** Passenger and Baggage Self-Service Processing	• **Requires** Timely Development • **Eliminates** Mag-Stripe Reading / MSR • **NOT** Backwards Compatible
Why?	• Mitigates **Cyber Security Risks** • Leverages **latest technologies**	• Streamlines **Application and Platform Updates** • **Enhanced Integration** at Multiple Touchpoints
How?	• **Active Engagement** with All Stakeholders • **Provide Guidance** through Workshops, Implementation, and Development Guides	• **Provide Informational Resources** such as a Knowledge Base and an Interactive Airport Readiness Map • **Collaborative Industry Effort**
Benefits	• **Operational Flexibility** • **Mobile Application** Support • Enhanced Support for **Payment Card Industry Standards**	• **Predictable Release Cycles** • **Improved Certification** that Provides **Deployment Consistency**
When?	• **1 May 2024 – Technical Specification Release** (updated) • **1 January 2025 – CUSS 2 Transition Phase starting** (updated) • **1 January 2026 – CUSS 1.x platforms are discontinued**	
Wanted	**Airline & Airport Participation** on the CUSS Meetings
