### 4. Transfer charges:

US\$3.00 per outgoing transfer

### 5. Administration fee (for errors and rejections due to incorrect data provided by the Member)

US\$50 per erroneous payment instruction that was corrected

\*\*\*\*\*

#### **Note - Application of the ICCS Service Charges:**

The above mentioned charges and fees are applied on a quarterly basis. They are offset against the credit interest earned by the Member over the quarter and the positive or negative balance is then included in a specific ICCS clearance cycle approximately 6 weeks after the quarter's end.

Depending whether the amount is a receivable or a payable, the Member's receivable will be reduced or increased in that specific clearance in USD, or equivalent foreign currency if the airline does not have any USD receivables in that particular clearance cycle. An email will be sent to each Member a few days before the actual clearance advising them of the clearance number where the quarterly charges will be applied. The email will also include the ICCS Quarterly Statement reflecting all the specific details.
